» North Campus Building Plans

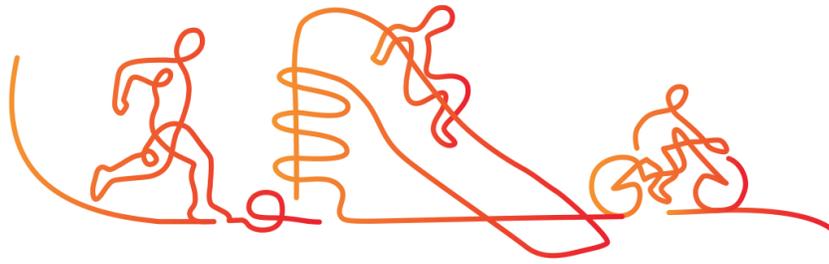

12 things to look out for at the North Campus

- 1 State-of-the-art facilities for physical therapy co-located to movement science.
- 2 An MRI, EOS and three digital X-ray units, as well as shelled space for CT, additional MRI and X-ray.
- 3 A youth soccer field with the ability to accommodate group rehab sessions, injury prevention and coaching clinics.
- 4 Two operating rooms plus additional shelled space for future ORs.
- 5 Conference room facilities for small-to-mid-size meetings and conferences.
- 6 Space to support orthotics and prosthetics, psychology, an infusion lab and other ancillary patient services.
- 7 Facility will be five stories with 1.5 floors fully-shelled with strategically placed shelled space throughout the building for future growth.
- 8 Designated outpatient clinics for rotating clinics, which include, general orthopedics, arthritis and hand services. Plus, dedicated clinics for fracture and sports medicine. Shelled space for future clinical needs.

- 9 Total sq. feet 345,000, including a central utility plant.
- 10 Movement Science facility with added capabilities for sport-specific training and testing.
- 11 Playground and walking trails throughout the campus for our patients and other visitors to use.
- 12 Exterior and interior design will incorporate the colors of the Main Campus.

» Boundless - A Centennial Celebration

BOUNDLESS

THE CENTENNIAL CELEBRATION FOR **SCOTTISH RITE HOSPITAL**
FOR CHILDREN

The centennial celebration was unveiled at the groundbreaking and we are so excited to share it with you!

When there are no bounds, there are no constraints. No limits.

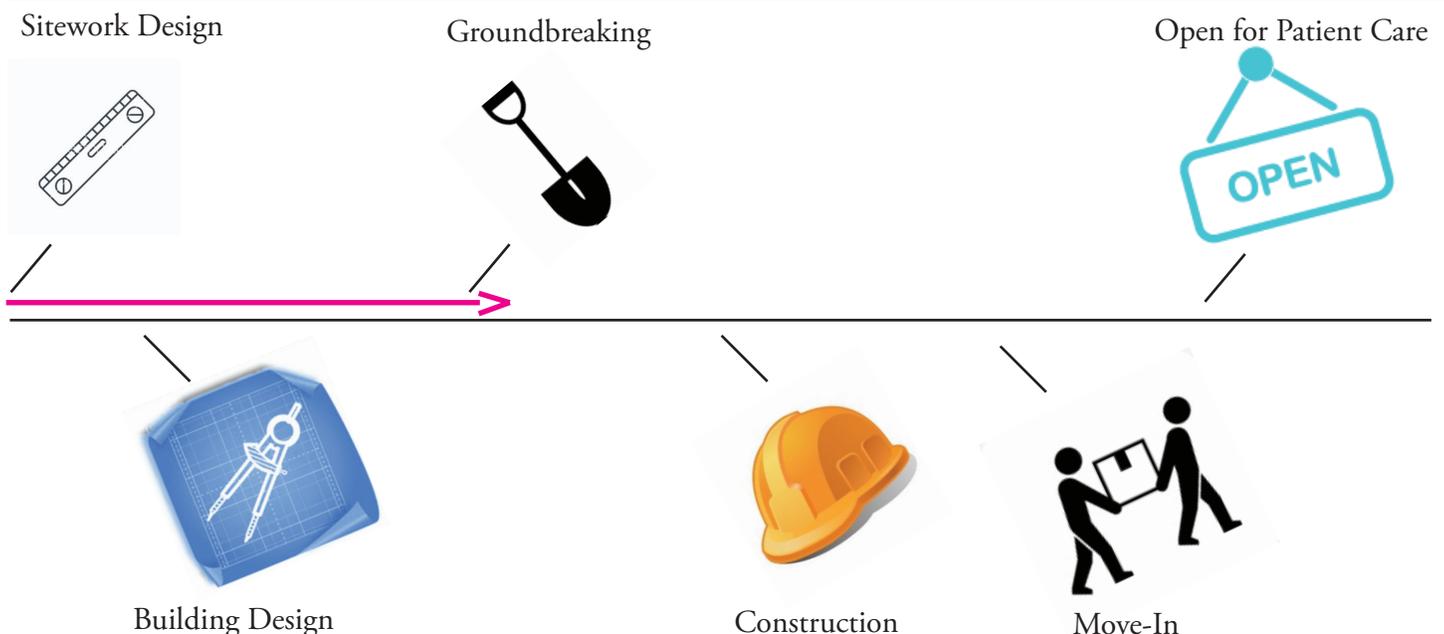

Every one of our patients has Boundless potential. And we want each of them to experience the Boundless joy of being a kid. Whether it's on a mountain. A dance floor. Or a playground.

Which is why everyone at Scottish Rite Hospital works with Boundless energy, determination and vision. But beyond our patients, doctors, researchers and caregivers, Boundless indicates the potential of our future. We're poised to flourish in whole new ways. To knock down walls. To color outside the lines. To climb higher, run faster and jump farther.

Who knows what we'll achieve over the next 100 years? What new technologies we'll pioneer? What innovative ways we'll find to mend spines, heal bones and repair limbs? All so we can continue to help give children back their childhood.

The possibilities are BOUNDLESS.

»A Note from Bob Walker

We are thrilled to begin our North Campus journey with this momentous groundbreaking. In the last 95 years, our institution has seen tremendous growth, change and advancements in our mission to give children back their childhood. Recognizing the need for a patient access point in the fast-growing northern suburbs, we have decided to take a historic step forward for our organization and expand to Frisco. The new facility, located on 40 acres at the corner of Lebanon Road and the Dallas North Tollway, will initially serve outpatients with clinic visits and day

surgery when it opens in 2018. The North Campus will also be the permanent home of the Center for Excellence in Sports Medicine. In addition to sports medicine, the Frisco campus will treat general pediatric orthopedic conditions such as scoliosis and clubfoot. Our goal is to provide the same high-quality care in our northern communities that patients from all over the state have been enjoying for almost a century. We thank you for your support during this time of growth and we look forward to celebrating this milestone achievement with you in 2018 when the new campus opens. Thank you for all that you do for this organization. We could not move forward with this project without the support of a truly world-class staff. You are the driving force behind all that we do. Thank you.

»A Note from Dan Sucato, M.D., M.S.

The medical staff is excited for our expansion to Frisco, as it will allow us to serve more children than ever before. Building in this growing community will allow us to expand our uniquely Scottish Rite Hospital care to an entirely new patient population. The new five-story North Campus will treat the same pediatric orthopedic conditions seen at the Main Campus, including spine, hip, hand, foot and limb disorders. Also, the North Campus will be the official home for the Center for Excellence in Sports Medicine, allowing us to expand and grow that practice in order to better serve young athletes. Our acute injury clinic, currently housed at the Plano location, will move to the North Campus. Upon opening, there will be operating rooms for day surgeries, a state-of-the-art movement science lab, and physical/sports therapy center with space to expand in the future. The possibilities for patient-centered care are endless and we feel deeply honored to share our expertise with a new community of children and adolescents.
